Cover Letter

Dear Sir/Madam,

Below, please find an outline of the value I believe I can create for your organization:

"My Brand is Value Creation whilst Navigating Uncertainty, Embracing Disruption and Finding Opportunity. Because Uncertainty is the only Certainty there is and Knowing how to Lead, Manage and Live with Insecurity is the only Security."

My creativity has helped me develop expertise in transforming Intangible Ideas into tangible actions. I see opportunity where many see Danger. As a Global Team Player, I work with cross functional Teams, Suppliers, Customers and Peers, to Identify, Prioritize and Transform Ideas into Actions. No matter how tough a situation can get, "Never Surrender" is part of my DNA. I am a very good team player. To teach and mentor colleagues/juniors in order to make them successful and make their dream come true is my unique characteristic that is loved by all who worked with/under me.

Another key recurring theme in my career has been "CHANGE" and it has taught me to live and prevail with "Uncertainty". There is Nothing more constant in the World than Change, and it is in the waves of Change that we often find our true direction and success. I kept adding value to myself and always shared it with the nears and dears. Adopting the change in the field and adapting the ways to make the situation comfortable, I always define myself as an obedient student and a good learner. I learn by teaching, and thus I decided to become a mentor. This is the best part of my life which made me accept the change and help others in adopting the changes in the field.

My extensive professional background includes a wide range of experience, nothing has ever stopped me from successfully shifting industries and fields in which I had no prior experience. I always find a learning curve and adopt myself to the requirements. And to people who claim that previous experience of an area I had not worked in is necessary, my reply is:

"Never be afraid to try something New, remember that Amateurs built the Ark and Professionals Built the Titanic."

I have been a trusted team member and mentor, acknowledged for Developing and Empowering Employees, Supporting and Inspiring Peers, Advising CEOs and Boards.

Respectfully,
Krunalkumar Shah
